

# Construction Update July 28, 2021

New York Transco and its contractors began construction on the New York Energy Solution (NYES) in March 2021. Please accept this update on our work. We are performing active construction work in the towns of Schodack, Stuyvesant, Stockport, Ghent, and Claverack.

## Completed and Current Work:

- Construction of Phase I's Churchtown Shoofly electric bypass line (Claverack), the Baker Road Laydown Yard (Claverack), and the Falls Industrial Park Road Laydown Yard (Ghent) is complete.
- Phase II - Northern Portion transmission line construction has started.
- Churchtown Switching Station (Claverack) and Knickerbocker Switching Station (Schodack) construction has started.
- Flagging and staking of the entire corridor continues from north to south.

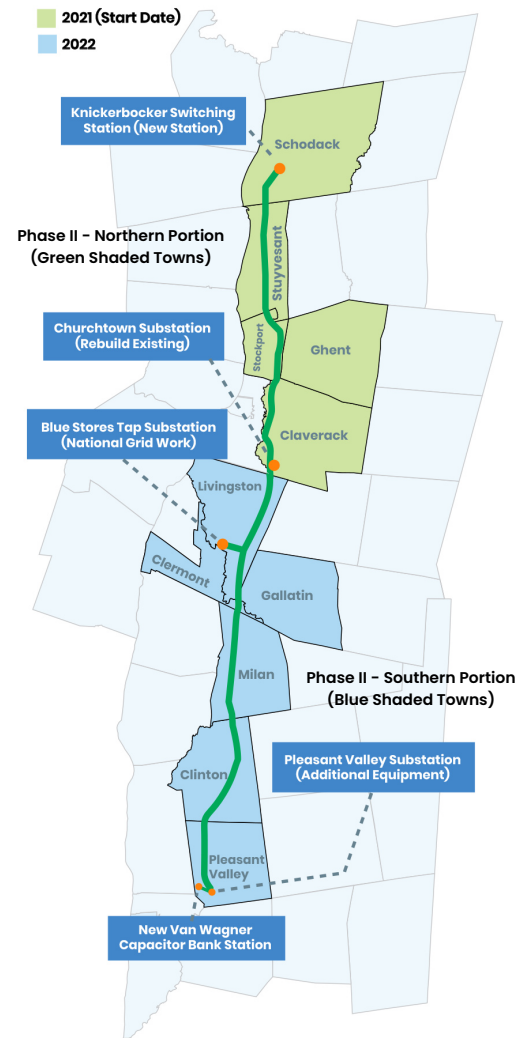

## Upcoming Work:

- Flagging and staking of the corridor will continue all the way to the project terminus in Pleasant Valley.
- Phase II - Northern Portion transmission line construction will continue south to the Churchtown Switching Station in Claverack.
- Phase II - Southern Portion transmission line construction will begin in 2022, pending regulatory approvals.
- Vegetation removal will occur as designated between November 1<sup>st</sup> to March 31<sup>st</sup>. More information on this will be shared as the project progresses.

## Construction Update Resources

Updates on construction work, including activities and locations, can be found at [www.NY-ES.com](http://www.NY-ES.com). The website is updated regularly. You may also call the NYES team for updates.
